

MECHANIC DIESEL ENGINE

The course broadly covers the complete functioning, overhauling of Diesel Engines of vehicles of all categories being fuelled by Diesel. Diesel Mechanics also deal with the repair work and maintenance of heavy motor diesel engines such as trucks, buses, public transport vehicles, heavy industrial and construction machinery and equipment and other diesel driven machines such as tractors, cranes, bulldozers etc. The course has a good demand in the Automobile industry thereby giving advantage for either employment or self-employment.
